PENNSYLVANIA AMERICAN WATER ANNOUNCES ALLEGHENY COUNTY WATER SYSTEM UPGRADES

Pittsburgh, Pa. (April 8, 2019) – Pennsylvania American Water announced today the start of construction to replace more than 11 miles of aging water main in Allegheny County to improve service reliability and fire protection for residents. The combined cost of these system improvements is approximately \$13 million.

“Pennsylvania American Water is continuing to make investments that will improve pressure and fire flows for our Allegheny County customers,” said Senior Manager of Operations Joseph Tackett. “By replacing aging water mains - that are in some cases more than 100 years old - we can ensure a high level of quality and service.”

The latest pipeline improvements are in addition to the installation of a new 1.1 million-gallon water storage tank along Bellbridge Road in Lincoln Borough, which started during the summer of 2018. The approximately \$4 million tank project will be completed by early summer of this year.

Over the next several months, the company plans to replace aging water main in the following communities:

Pennsylvania American Water will notify customers prior to the start of construction in their respective neighborhoods. Customers will be notified prior to any planned interruptions of service. During construction, customers might experience temporary service interruptions, discolored water and/or lower than normal water pressure.

Crews will work as quickly as possible to shorten the length of these temporary inconveniences. For more information, contact Pennsylvania American Water's customer service center at 1-800-565-7292.

PENNSYLVANIA AMERICAN WATER PLANS \$13 MILLION IN WATER SYSTEM UPGRADES IN ALLEGHENY COUNTY SERVICE AREAS
